This exploded view diagram illustrates the assembly of a vehicle suspension system. The central component is a long, curved lower control arm (5). At the front end, a ball joint (16) is shown being attached to the control arm. A steering knuckle (1) is positioned at the top left, with a wheel hub (4) and a wheel (3) being assembled onto it. A tie rod end (2) is also shown. The rear end of the control arm (5) is connected to a trailing arm (12) via a bush (6). The trailing arm (12) is further connected to a frame member (13) through a spring (14) and a shock absorber (15). A brake master cylinder (17) is shown with its mounting bracket (18) and a push rod (19). A brake slave cylinder (20) is shown with its mounting bracket (21) and a push rod (22). A brake line (23) connects the master and slave cylinders. A brake hose (24) is shown connecting the master cylinder to the slave cylinder. A brake pad (25) is shown being attached to a brake caliper (26).
